

SMITH RIVER STATE PARK AND RIVER CORRIDOR

Visitor Use & Statistics Monitoring Report 2021

A summary of visitor use statistics, management activities and resource and social conditions on the Smith River corridor during the 2021 field season

Submitted by: **Nate Kluz**

SECTION 1 – EXECUTIVE SUMMARY

Visitation

The 2021 float season experienced the lowest amount of use since 2011, due to low water flows forcing an early end to floating in late June. There were only 4,226 total floaters this season, 29% fewer than the five-year average and 12% lower than the twenty-year average. Use was down among all user types, but most of all among private floaters at 11% below the twenty-year average and 2,068 floaters less than 2020. Outfitted use was only 3% below the twenty-year average, but 21% below the previous five years. Landowner use was down significantly as well and accounted for 0.19% of all user days. Despite the decrease in users, the abbreviated season continued the trend of above average floaters per group. Both private and outfitted parties were 11% larger than the twenty-year average.

The only major statistical change this season was a dramatic increase in applications for the permit lottery. There were 15,162 applications this year, a 49% increase over the average from the previous five seasons. There was a similar sudden extreme increase in applications for other western permitted rivers.

Snowpack, Rainfall and River Flows

Flows on the Smith in 2021 were very low and the float season was abnormally short. As of January 01, 2021, snowpack was 88% of normal for the day and 33% of the median peak. Peak snowpack occurred during the last week of April and only reached 83% of the normal median peak. Precipitation in April was 67% of normal, 136% in May and only 18% in June. The flow peaked on 5/27/2021, two weeks earlier and 34% lower than average. The daily mean flow only exceeded the twenty-five-year average on three days from April-October. Flows dropped below 200 CFS on 6/13/2021 (average July 20th) and below 100 CFS on 6/24/2021 and only averaged above 100 CFS on one day through October. Floater use dropped just as precipitously with a peak of 508 floaters on the river on June 13th to zero floaters less than two weeks later on June 26th.

Water temperatures were also well above average for most of the season prompting a hoot-owl closure from June 28 through August 22.

2021 also saw a return of Cladophora algae. Algae had been scarce in the previous three years due to above-average flows. As of the last week of June, the algae was widespread and a slight nuisance, but not as prevalent as the 2016 and 2017 float seasons.

Algae at Rock Creek

Social Conditions

The qualitative social indicator which measures satisfaction levels related to “encounters with other boats while floating the river” is the basis for assessing floater satisfaction with the *overall* level of solitude on the Smith River. 92.05% of the floaters fell into the range of “Neutral to Liked Very Much.” There is a correlation between the number of boats seen per hour and the level of satisfaction. On average, respondents reported seeing 1.07 boats per hour with an average satisfaction of 3.91. This is well below last years’ 1.4 boats per hour. Despite the considerable decline in boats per hour, the level of satisfaction remained the same. These results are a strong indication of high floater satisfaction with the overall level of solitude.

Most of the other statistics within this report are within similar ranges of previous years. The perception of crowding while launching at Camp Baker has continued to decline after peaking at over 50% in June of 2018. Only 19% of floaters reported feeling crowded at Camp Baker. It seems that this significant decline, especially over the past two seasons, is most likely attributable to the added space at Camp Baker due to the camping closure and the convenience of the pre-registration process.

SECTION 2 – MANAGEMENT ACTIVITIES

Staffing

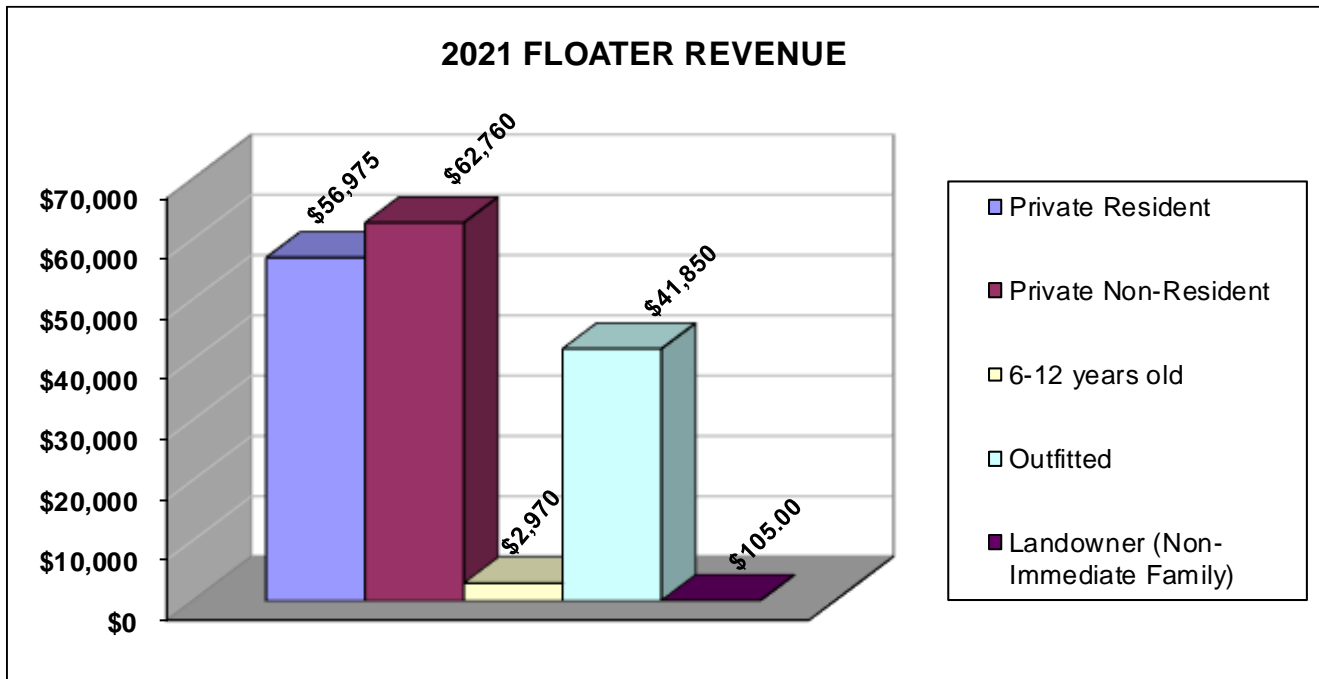

Employees from Montana Fish, Wildlife & Parks (FWP) Region 4 and Helena-Lewis and Clark National Forest (USFS) involved with the 2021 Smith River State Park & River Corridor program included:

- Colin Maas – Recreation Manager – Smith River (FWP)
- John Taillie – Region 4 Recreation Manager (FWP)
- Robert Gliko – Resource Specialist (USFS)
- Nate Kluz – FWP Lead River Recreation Ranger (FWP)
- Cody Kenyon – River Recreation Ranger (FWP)
- Andrea McElwain – River Recreation Ranger (FWP)
- Don Mendenhall – River Ranger (USFS)
- Joshua Wagoner – Former Region 4 Maintenance Supervisor (FWP)
- Krystal Phares – Smith River Reservation Clerk (FWP)

Numerous other employees from Region 4 FWP and the Helena Headquarters office, as well as individuals from the USFS, played a role in a team effort to make the Smith River State Park & River Corridor program work successfully.

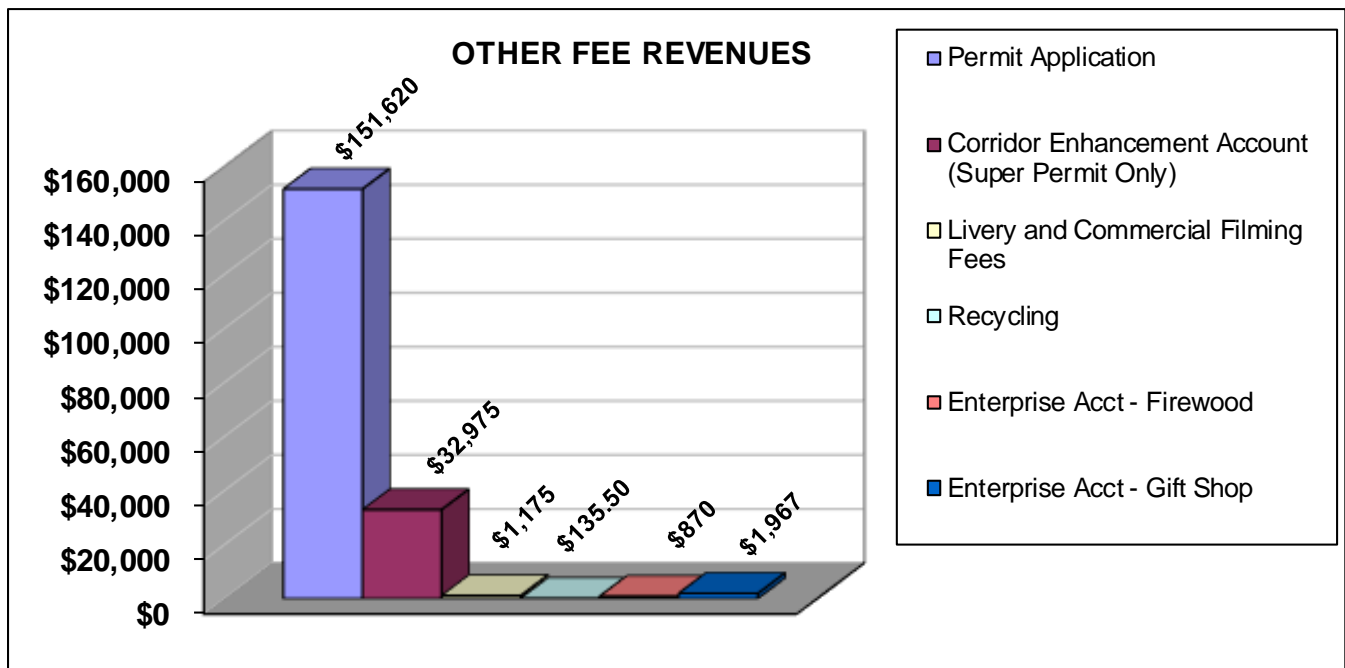

Fee Revenue

Total “floater fee” revenue collected in 2021 was \$164,660. Floater fee revenue decreased by \$70,287.50 compared to 2020 revenues.

GRAPH 1: FLOATER FEES COLLECTED IN 2021

Total “other fee” revenue collected in 2021 was \$188,742.50. Other fee revenues increased by \$36,639.50 compared to 2020 revenues.

GRAPH 2: OTHER FEES COLLECTED IN 2021

The following floater fees approved for the 2021 season by means of the Smith River State Park Biennial Rule:

- Permit application fee (residents and non-residents, non-refundable) = **\$10.00**
- Montana Resident Floaters Age 13+, Outfitter Staff = **\$25.00**
- Non-Montana Resident Floaters Age 13+ = **\$60.00**
- Children Ages 6-12 (Resident or Non-resident) = **\$15.00**
- Landowner Non-Immediate Family = **\$7.50**
- Outfitted Client Floater = **\$100.00**
- Outfitted Launch Fee = **\$200.00**
- Outfitted Transfer Fee = **\$200.00**

Special Projects Completed in 2021

Camp Baker

- No projects in 2021.

Eden Bridge

- No projects in 2021.

River Corridor

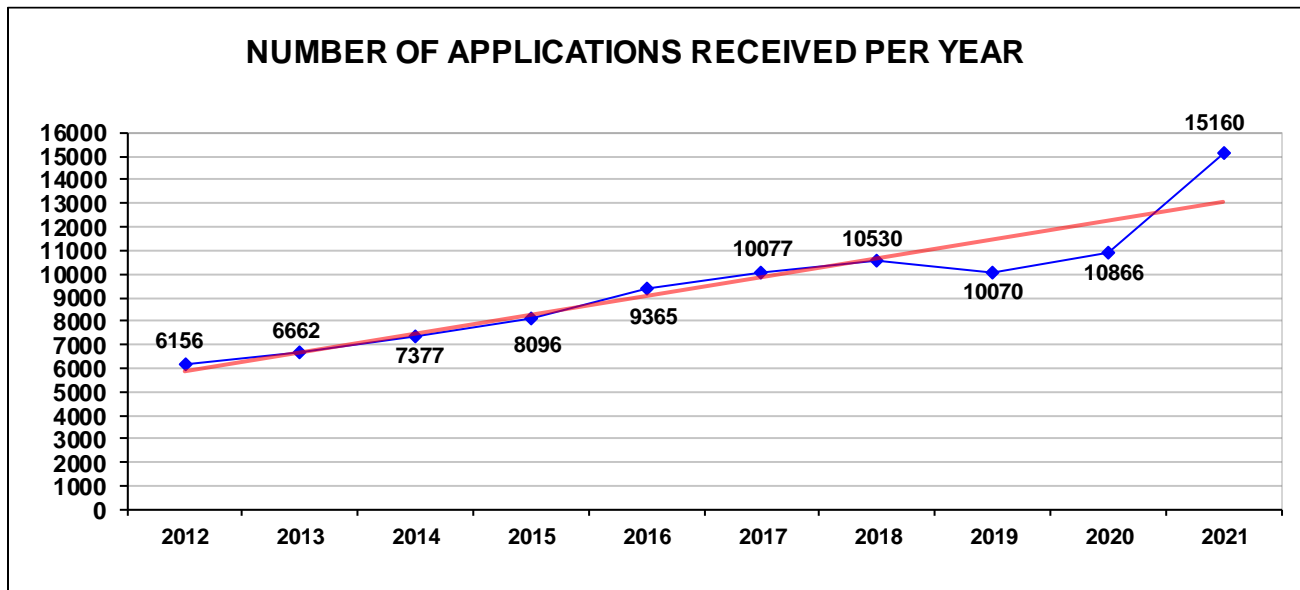

- Noxious weed control efforts were undertaken by the Smith River Habitat Project (SRHP), state, federal and county entities. Due to low-water, West River Land Management, on behalf of SRHP, was unable to perform their scheduled weed float. They were still able to spray throughout the summer and fall using OHV sprayers. Approximately 507 acres were treated this season. The Smith River Weed Volunteers were unable to do their annual float due to low water.
- Considerable time this season was spent removing hazard trees from boat camps. This included standing trees and trees that came down during a significant wind event in February. These camps included: Indian Springs, Upper Rock Garden, Syringa, Canyon Depth, Middle Cow Coulee, Lower Sunset Cliff, Parker Flats, Lower Ridgetop and Upper Rattlesnake. Hazard tree assessment and remediation will continue in 2022.
- River rangers dug 35 pit latrines this year. There have been 506 latrines dug in the last 15 years for an average of 34 per season.

Administrative - Management Actions and Covid-19 Mitigation Measures

- FWP initiated an update to the 2009 Smith River Management Plan. A draft Environmental Assessment was released for public comment in November. A final Decision Notice was signed on February 22, 2022.
- Camp Baker was again closed to overnight camping for the 2021 season.
- All registration, including payment and camp selection, was completed via phone two days prior to a floater's launch date. Floaters received permit paperwork at Camp Baker.
- Floater orientation talks were conducted outdoors at appropriate prescribed social distances.

SECTION 3 - VISITOR USE STATISTICS

Private Launch Applications

2021 FLOATER LOG COMMENT SUMMARY

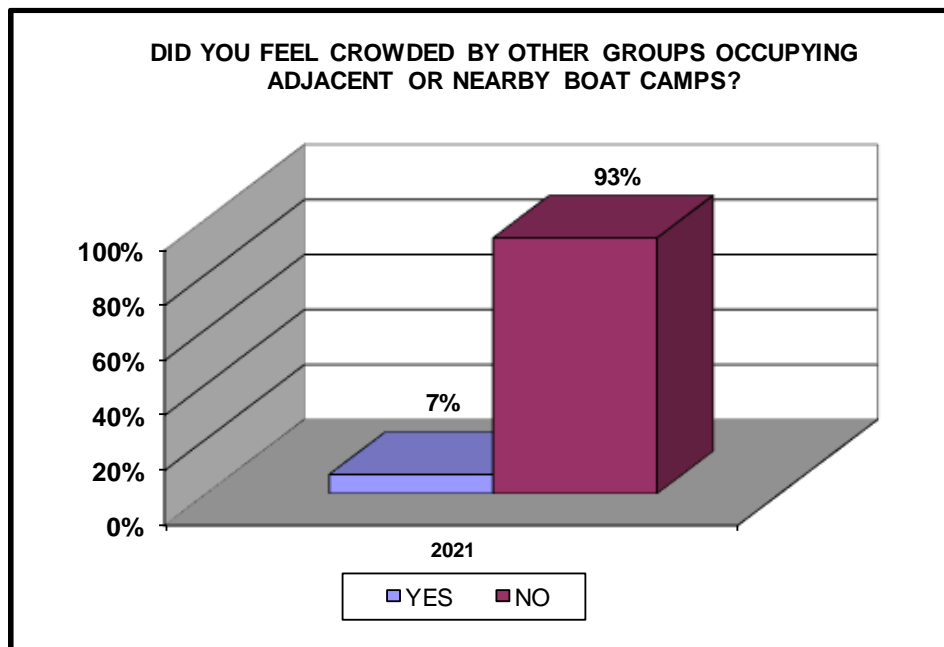

CAMPSITE QUESTIONS:

Question: Overall, how satisfied were you with this boat camp?

GRAPH 4: BOAT CAMP SATISFACTION

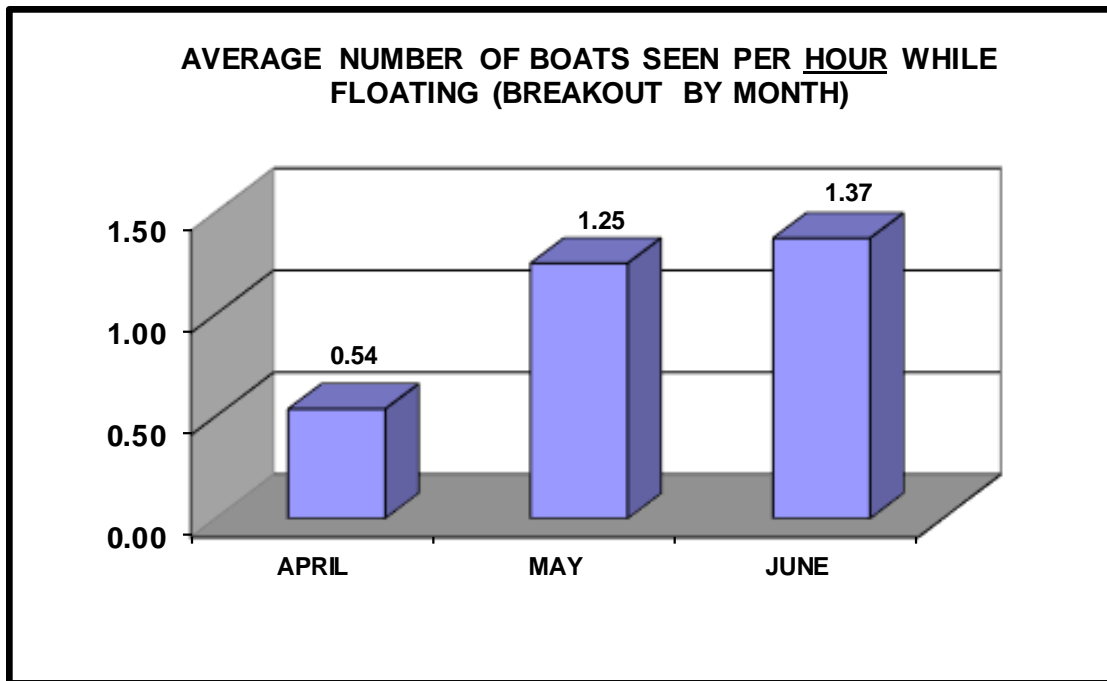

Question: Did you feel crowded by other groups occupying adjacent or nearby boat camps?

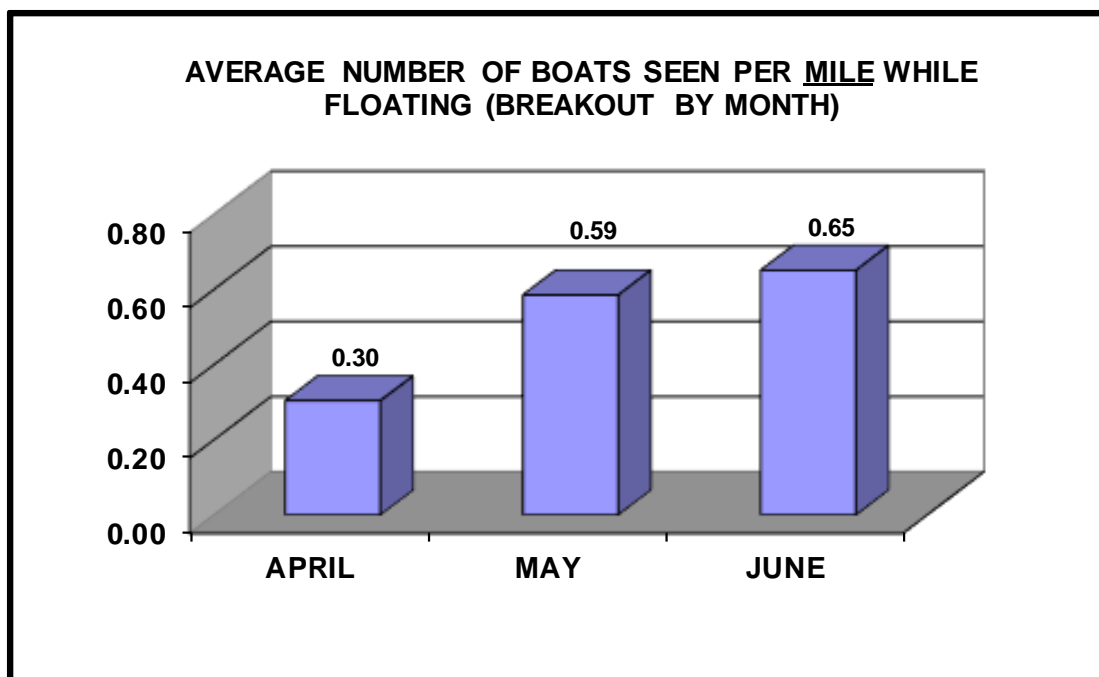

GRAPH 5: PERCEPTION OF CROWDING BY ADJACENT BOAT CAMPS

FLOATING QUESTIONS:

Question: How many other **boats** did you observe while floating the river today (excluding your group)?

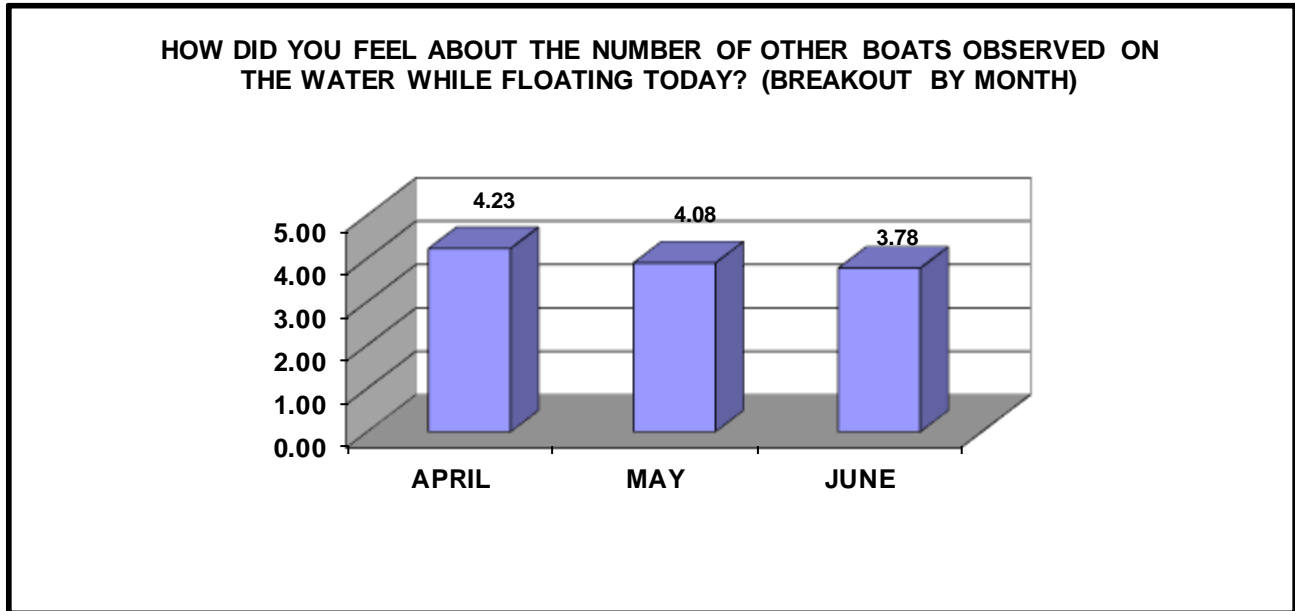

GRAPH 6: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER HOUR

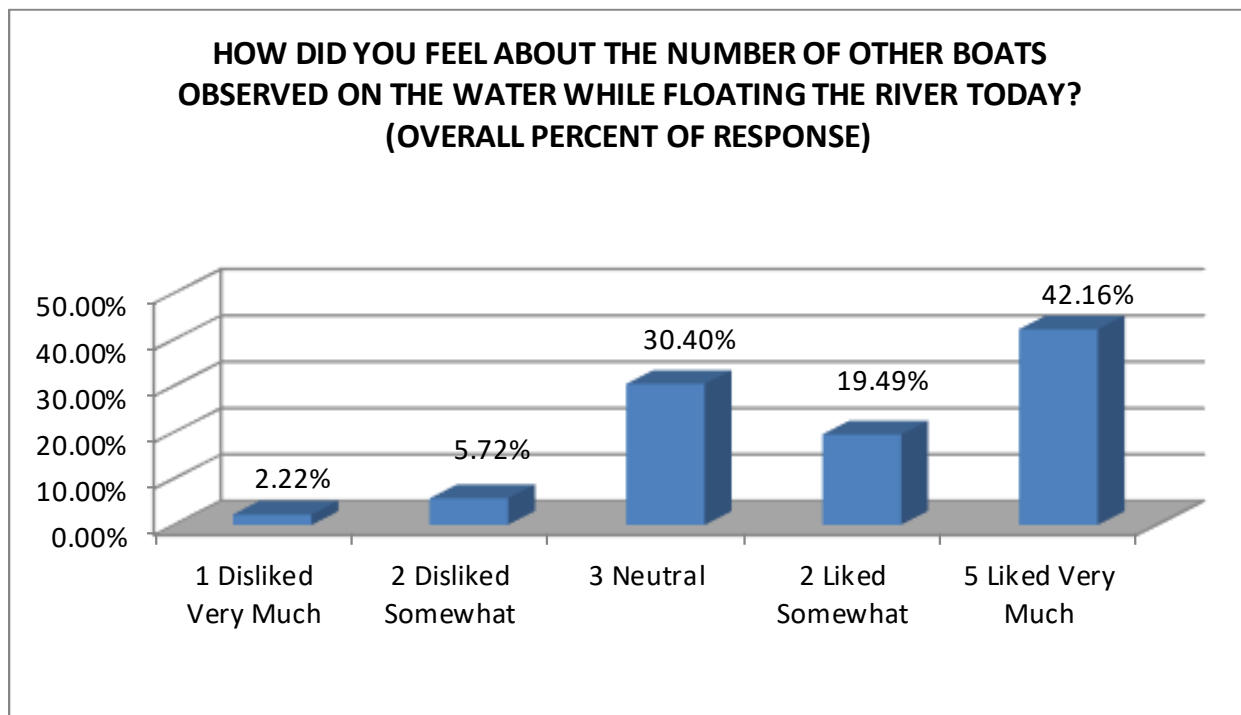

GRAPH 7: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER MILE

Question: How did you feel about the **number** of other boats observed **on the water** while floating the river today?

Beginning in 2010, FWP implemented the new social indicator of encounters with other boats while on the river. This indicator has become the basis for assessing floater satisfaction with the overall level of solitude. The corresponding standard, that defines the appropriate satisfaction level with solitude, has not yet been determined.

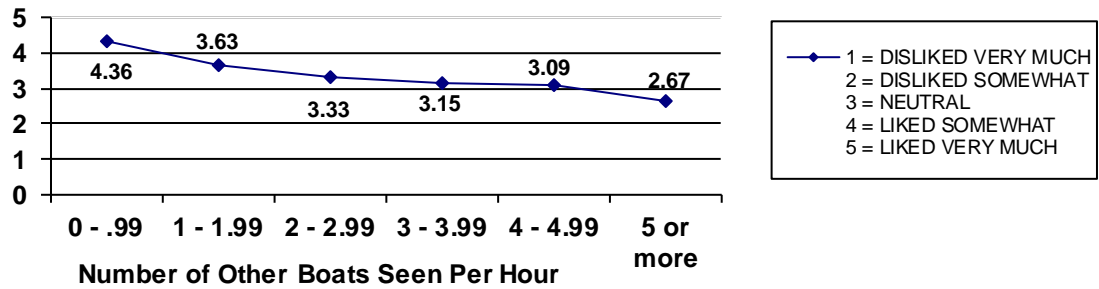

GRAPH 8: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER DAY

GRAPH 9: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER DAY – OVERALL PERCENT OF RESPONSE

**HOW DID YOU FEEL ABOUT THE NUMBER OF OTHER
BOATS OBSERVED ON THE WATER WHILE FLOATING THE
RIVER TODAY? (OVERALL RESPONSE - PER HOUR)**

*Less than 8% of respondents reported seeing 3 or more boats per hour

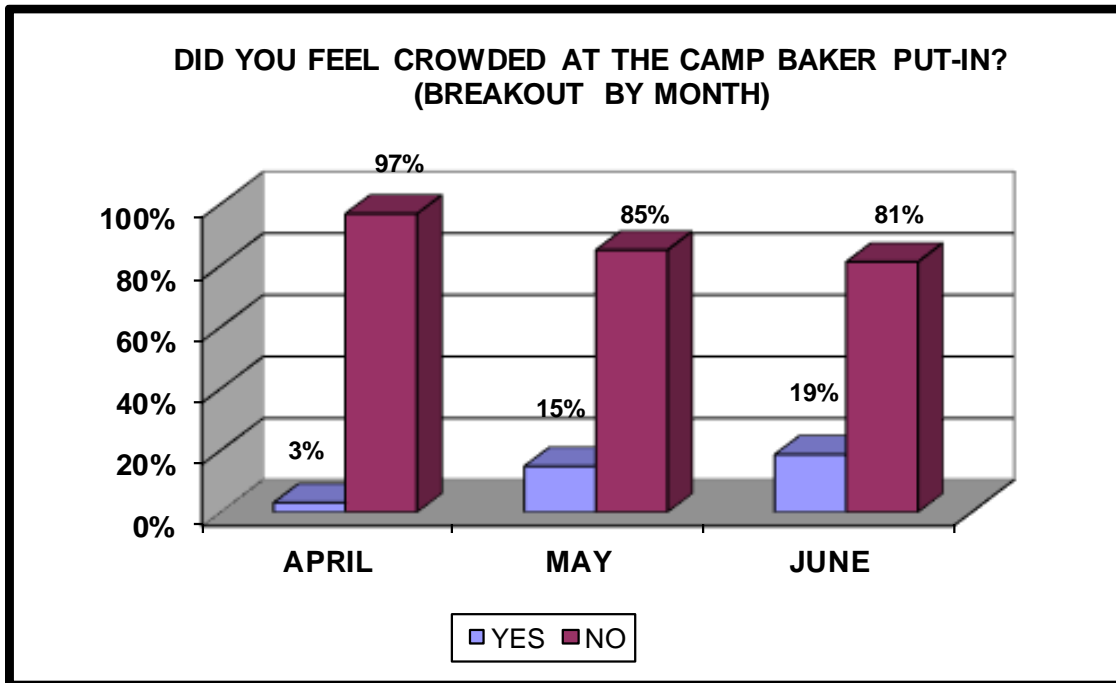

**GRAPH 10: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER DAY – OVERALL
RESPONSE PER HOUR**

Written responses to questions 1, 2, 5 and 7 of the floater logs are contained verbatim in the 2021 Floater Log Comments document.

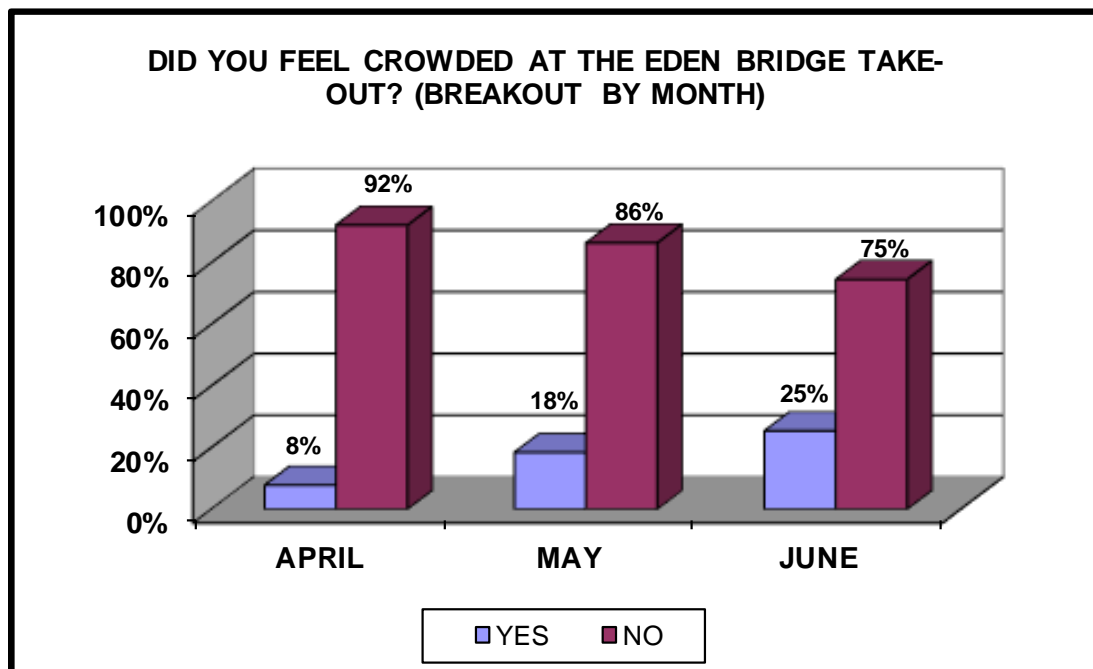

Bald Eagles Below Hound Creek

Question #3: Did you feel crowded at the put-in? Yes or No

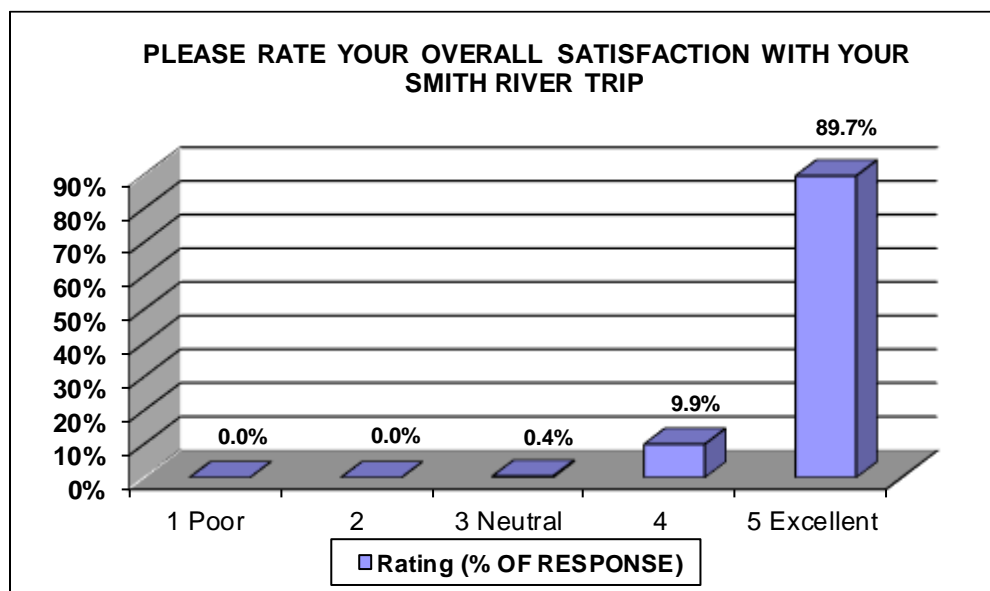

GRAPH 11: FLOATER PERCEPTION OF FEELING CROWDED AT CAMP BAKER PUT-IN

Question #4: Did you feel crowded at the take-out? Yes or No

GRAPH 12: FLOATER PERCEPTION OF FEELING CROWDED AT EDEN BRIDGE TAKE-OUT

Question # 7: Please rate your overall satisfaction with your Smith River trip.

GRAPH 13: FLOATER OVERALL SATISFACTION WITH SMITH RIVER TRIP

SECTION 4 – RESOURCE AND SOCIAL CONDITIONS

River Flows

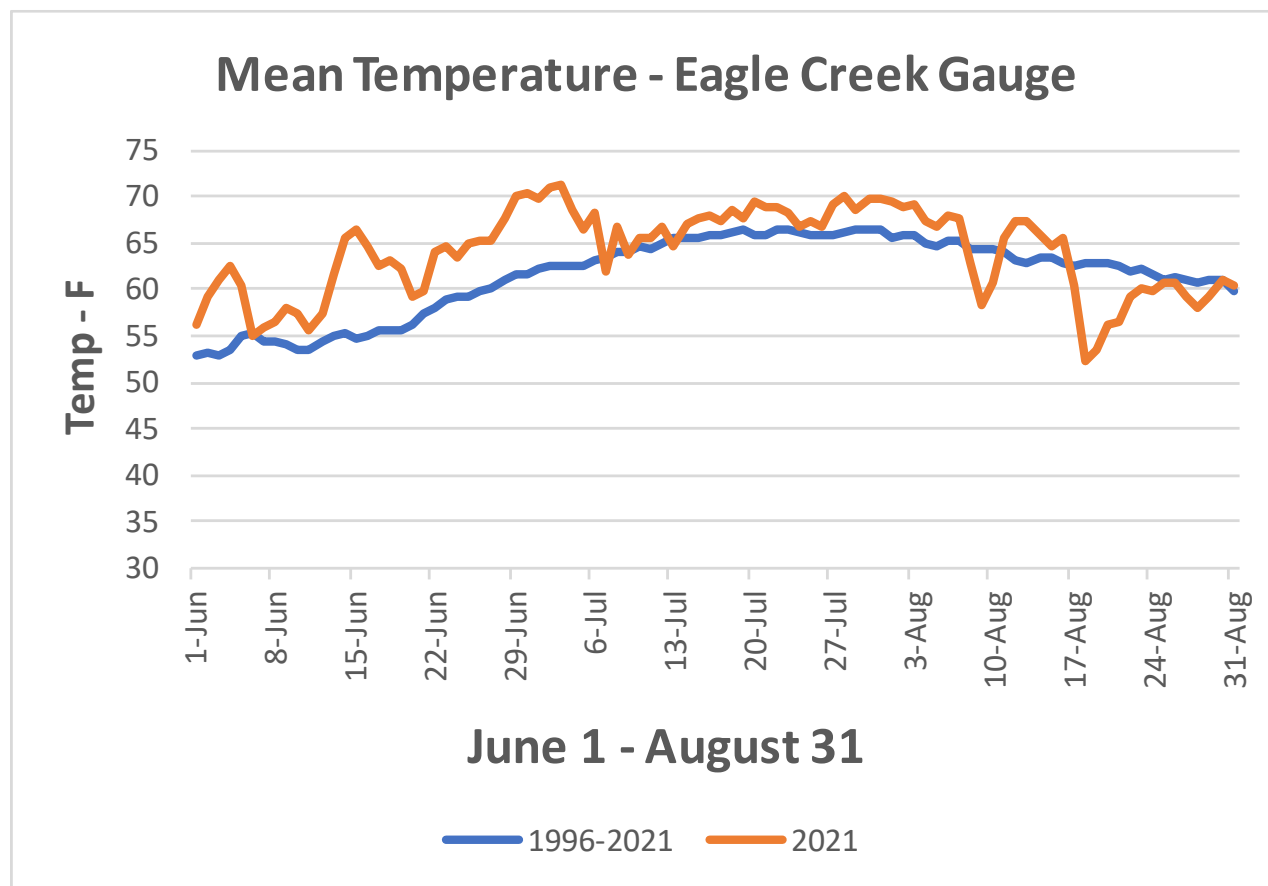

The lowest measured stream flow for the 2021 season was 36 cfs (8/02/21), while the peak stream flow was 588 cfs (5/07/21). *High/Low flows represented as daily mean values.*
